## EASTFIELD RESOURCES LTD.

[ETF-V] 8,281,451 SHS.

## CYPRUS CANADA INC.

SPANISH MTN. ASSAY RESULTS - Seamus Young, president, reports Consolidated Logan Gold Mines Ltd. has received assay results from the first of several trenches on the Spanish Mountain joint venture near Likely, about 70 km northeast of Williams Lake, BC. Cyprus Canada can earn up to 50% of the property by making cash payments of \$415,000 and spending \$1,500,000 over four years. Cyprus can elect to increase its interest to 70% by carrying the property to production, in which case Eastfield Resources Ltd.'s interest would be reduced to a carried 15% and Cons. Logan with a 15% carried interest.

Cyprus Canada, the operator, is examining the bulk mineable potential of the property through a comprehensive trenching and sampling program. Of 648 metres of trenching in the first trench, two separate sections totalling 176 metres (557 ft) average 1.204 grams gold/tonne (0.035 oz/ton). A number of higher grade sections intersected by trenching are tabulated as follows:

	TRENCH SAMPLE	LENGTH	LENGTH	GOLD	GOLD
	METRES	METRES	FEET	GR/T	OZ/T
	0-112	112	367	0.847	0.025
INCLUDES	96-112	16	52	1.579	.046
	284-514	230	755	.745	.022
INCLUDES	284-348	64	210	1.829	.053
INCLUDES	312-344	32	105	2.911	.085

All lengths are downslope measurements. The trenching program, which started 9May96, has covered a total downslope distance of 1,860 metres in three parallel trenches, spaced 200 to 300 metres apart. The property is underlain by siltstone, intermediate to felsic volcanics and high level felsic to intermediate intrusive rocks. The current program is budgeted to complete 4,000 metres of trenching by mid July. (SEE GCNL NO.95, 15May96, P.3 FOR PREVIOUS SPANISH MOUNTAIN PROJECT INFORMATION)
