## INTERNATIONAL SKYLINE GOLD CORP.

[ISC-V, T] 22,200,386 SHS.

NEW BRONSON SLOPE - Cliff Grandison, president, International RESOURCE ESTIMATES Skyline Gold Corp., reports the results of a new resource estimate by Montgomery Consultants Ltd., of Vancouver, for its 100%-owned Bronson Slope gold, copper, silver, molybdenum deposit located about 60 km north of Stewart, northwest BC.

The calculation using a block model based on all drilling and geological data is shown in the table below:

RESOURCE CATEGORY	METRIC TONNES MILLION	GOLD OZ.	COPPER LBS. MILLION	SILVER OZ. MILLION	NSR CDN. \$/T
MEAS. & IND.	54.7	981,000	224.3	4.2	11.85
INFERRED	20.7	315,000	77.1	1.2	10.25
TOTAL	75.4	1,296,000	301.4	5.4	11.41
AVERAGE GRADE		0.017 oz/t	0.18%	0.072 oz./t	

The above estimate was prepared using a cut-off grade of Cdn. \$8.00/tonne net smelter return based on gold at US \$385/oz., copper at US \$1.10/lb., silver at US \$5.25/oz. and the Cdn. dollar at US 75¢. Molybdenum values were not included in total metal values. A 100-metre search limit was used to krige (block out in three dimensions and calculate) the metal grades.

Definition drilling is being planned to increase the confidence level of these estimates. The property also has undrilled potential which will be tested. Priority will be given to the definition drilling.

A 250-metre second pass search limit was used to demonstrate the infill drilling potential of the deposit, and the following estimates were reported using a \$8.00/tonne cut-off and a \$6.66/tonne cut-off.

TABLE A - \$8.00/TONNE CUT-OFF

RESOURCE CATEGORY	METRIC TONNES MILLION	GOLD OZ.	COPPER LBS. MILLION	SILVER OZ. MILLION	NSR CDN. \$/T
MEAS. & IND.	54.8	983,000	224.7	4.2	11.85
INFERRED	84.5	1,236,000	309.2	4.9	9.95
TOTAL	139.3	2,219,000	533.9	9.1	10.69
AVERAGE GRADE		0.016oz/t	0.16%	0.96oz/t	

TABLE B - \$6.66/TONNE CUT-OFF

RESOURCE CATEGORY	METRIC TONNES MILLION	GOLD OZ.	COPPER LBS. MILLION	SILVER OZ. MILLION	NSR CDN. \$/T
MEAS. & IND.	68.8	1,133,000	263	4.95	10.91
INFERRED	118.0	1,597,000	397	6.57	9.20
TOTAL	186.85	2,730,000	660	11.52	9.84

The deposit contains a near surface high grade zone with a low strip ratio. Using a \$13.33 (US \$10.00)/tonne cut-off, the resource contains in excess of 20,000,000 tonnes grading 0.778 grams gold/tonne, 3.1 grams silver/tonne and 0.226% copper with an average NSR of \$15.84. The bulk of this high grade resource is in the upper portions of the deposit and has the potential to be a starter pit.

Drilling is scheduled to resume the first week in June and be completed in July. Further drilling is being planned this year if required to complete a definitive mineable reserve estimate for a feasibility study. (SEE GCNL NO.217, 10Nov95, P.4 FOR PREVIOUS BRONSON SLOPE PROJECT INFORMATION)
