DRC RESOURCES CORPORATION

[DRC-V] 2,251,751 SHS.

KAMLOOPS COPPER PROJECT OPTIONED - DRC Resources Corp.
has received VSE

approval to buy 100% of the 70 claim, 3,500 acre Python mineral group near Kamloops B.C. for 100,000 shares, subject to a 2% net smelter return royalty. DRC is preparing an exploration program for the Python.

The property has three significant copper-gold-silver zones including a resource estimate of 1,000,000 tons of 0.74% to 1.13% copper with values for gold-silver considered a prime exploration target for another Afton-type deposit.

B.P. Resources Canada Ltd. in 1987 and 1988 reported the underground chip sampling and mapping indicate the copper occurrences contain significant gold and palladium with values up to greater than 20,000 ppm (2%) copper, 3510 ppb (0.11 oz/ton) gold, 1112 ppb (0.035 oz/ton) palladium from sampling of the workings. This area adjoins the Ajax ore deposit which Afton Mines is presently mining and has reserves estimates of 10,000,000 tons of 0.5% copper.

The Galaxy claims with reserves of 3,000,000 tons of 0.6% copper are owned by Getchell Resources and optioned to Teck Corporation and adjoin the Python claims to the west.
