GALAXY DRILL PROGRAM COMPLETED - James T. Gillis, president, Getchell Resources Inc., reports Teck Corp. has completed a 32-hole drill program on the Galaxy project located near Kamloops, south-central B.C. about 1.5 km due east of the Rainbow property and 3.5 km from Teck's Ajax Mine. SEE MAP OVERLEAF P.1. Afton engineering staff have begun their assessment of this deposit to see if it will fulfil their criteria for mining and milling at the nearby Afton Mill. Results will be made available as soon as possible. Teck is earning a 100% interest in the Galaxy property from Getchell.

Teck will resume drilling on the Rainbow Joint Venture (Teck 70%, operator/Getchell 30%) as soon as spring breakup conditions allow. Drilling will evaluate a new zone of copper and gold mineralization discovered by Teck while testing the Rainbow No.2 zone in late 1995. It is hoped tonnage developed in this area will allow Afton to exploit the Rainbow No.2 zone where recent drilling and archival data have outlined a resource of 14,100,000 tonnes of 0.5% copper to a depth of 300 metres.

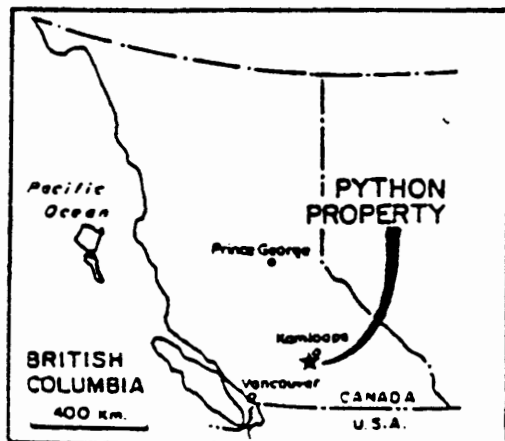

The Galaxy and Rainbow properties are located south of Kamloops within the Iron Mask Batholith. Surface rights are held by Teck as owner of the Sugarloaf Ranch and the existing haulage road from the current mining area (Ajax) to the Afton Mill traverses the Rainbow property. (SEE GCNL NO.19, 26Jan96, P.4 FOR PREVIOUS GALAXY PROJECT DATA & OPTION DETAILS)
