LA ROCK MINING CORPORATION

[LAR-V] 17,953,987 SHS.

BRANDYWINE DRILLING TO START - Robert E. Lee, president, La Rock Mining corp., reports preparation for drilling are underway on the McKenzie Zone geochemical gold anomaly on the 100%-owned, subject to 0.5% NSR, Brandywine property, 30 miles north of Squamish, southwest B.C. SEE MAP OVERLEAF P.3. The 250-acre (100 ha.) surface area of the McKenzie gold anomaly is 20 times the surface size of the combined DP Zone and Main Showing. This anomaly has been identified from prior Placer Dome Inc. soil geochemical and geophysical data.

Fox Geological Consultants are managing the McKenzie Zone program for La Rock and have established hole locations targeted on the peak gold values in the soil anomaly. (SEE GCNL NO.47, 6Mar96, P.4 FOR PREVIOUS BRANDYWINE PROJECT DATA)
