LLOYD-NORDIK RESOURCE ESTIMATE - Lloyd Tattersall,
president, reports

Big Valley Resources Inc. has received preliminary geological resource estimates for the Lloyd 2 target at the 100%-owned Lloyd-Nordik copper-gold property 60 km east of Williams Lake, central British Columbia. The table overleaf P.3 is a partial listing of the resource evaluation carried out by Montgomery Consultants Ltd. Metal values have been calculated in U.S. dollars using \$1 (US)/lb copper and \$400 (US)/oz gold metal prices. The dimensions of the Lloyd 2 target have not been fully defined and the mineralized zone remains open in several directions. Additional diamond drilling is currently underway to test both the dimensions of the Lloyd 2 mineralized zone and a number of new target areas. (SEE GCNL NO.51, 12Mar96, P.2 FOR PREVIOUS LLOYD-NORDIK PROJECT INFORMATION)
