NEW GOLD ZONE DISCOVERED - D. Bruce McLeod, president,

ON WILLOUGHBY PROPERTY Camnor Resources Ltd., and
50/50 joint venture partner Gold

Giant Minerals Inc., report gold assays for the first six holes drilled
at the Wilkie Zone on the Willoughby property have been received.

The Willoughby property is located 26 km east of Stewart, B.C. It is
immediately adjacent and geologically similar to Royal Oak Gold
Mines Ltd's Red Mountain property, where a comprehensive
evaluation with the purpose of increasing the previously reported
one million ounce gold reserve is presently being completed.

The Wilkie Zone was discovered by field crews following up on
a large soil anomaly discovered earlier in the year. The zone
consists of fault controlled quartz veining in which gold values in
association with variable pyrite, sphalerite and galena occur. At
surface, the zone has been traced along strike for 125 metres with
widths variable to 3 metres. It is open along strike. "Chip samples
returned encouraging values with the best sample averaging 0.572
oz. gold/ton across 1.8 metres. Silver and base metal values are
pending. To better evaluate the zone, nine holes totalling 817.2
metres were drilled. The drilling tested a 60 metre strike segment
of the zone at down dip depths of up to 70 metres. The drilling showed
the zone to pinch and swell along strike and down-dip. It is open in
all directions. The following is a summary of the results for the first
six drill holes:

HOLE NO.	INTERVAL METRES	LENGTH METRES	GOLD OZ/T
96-74	64.0-66.0	2.0	0.089
96-75	88.0-90.7	2.7	.295
	94.6-99.1	4.5	.103
AND	88.0-103.1	15.1	.127
96-76	52.9-55.4	2.5	.273
96-77	74.1-77.8	3.7	.469
96-78	52.9-54.3	1.6	.046
96-79	60.6-63.1	2.5	.550
OR	59.8-64.4	4.6	.310

Three follow up holes 96-85 to 87 have been completed and
results are pending. Drilling at the Edge Zone intersected
mineralization similar to elsewhere on the property; however, no
significant zones of gold mineralization were located. Camnor is the
operator.

Camnor continues to drill the Argentite property located 12
miles west of Silver Peak in Esmeralda County, Nevada. Assay
results from this program is expected later this month and will be
reported when available. (SEE GCNL NO.195, Oct.8/96, P.3 FOR
