**TENNYSON EXPLORATION UNDERWAY** - Dino Cremonese, P.Eng., president, Teuton Resources Corp., and Infinite Resources Inc, report a diamond drill program has started on the Tennyson property located 45 km north northwest of Stewart, northwest BC. Infinite Resources, the operator, is earning a 50% undivided interest in the Tennyson property by funding \$500,000 on exploration expenditures and issuing Teuton a total of 200,000 shares over three years.

Exploration carried out between 1985 and 1994 indicated the property's potential to host both epithermal gold-silver and copper-gold porphyry deposits. A 1992 diamond drill program localized along what has been interpreted as a pyritic halo surrounding a porphyry copper-gold zone returned promising intercepts ranging up to 0.40% copper and 0.51 grams gold/tonne over 110 feet. The 1996 diamond drill program is designed to further test this potential copper-gold porphyry. (SEE GCNL NO.185, 24Sept96, P.1 FOR CLONE PROJECT INFORMATION)
