TOMBSTONE EXPLORATIONS CO. LTD.
[TSO-T] 24,000,022 SHS.

Jackpot Project, BC: Tombstone acquired the formerly producing zinc, lead Jackpot project in southeast BC when it purchased New Jersey Zinc (Canada) in 1997. Previous resource development was concentrated in only five zones, with indicated reserves to date at about 1,000,000 tonnes grading 4.68% combined lead, zinc. Inferred reserves are about 3,200,000 tonnes. New Jersey Zinc estimated an exploration potential for an additional 6,000,000 to 10,000,000 tonnes from known targets. Much of this previous work was not assayed for silver or gold, even though during the period 1902 to 1929 more than 1,000 ounces of gold (0.016 oz/ton) and 270,000 ounces of silver (4.35 oz/ton) were mined from two zones. The company is currently considering proposals in respect of Jackpot.
