## TEUTON RESOURCES CORP.

[Tuo-V] 12,091,050 SHS.

NORTHWEST BC EXPLORATION PLANNED - D.Cremonese, P.Eng.,  
P.Eng., president,  
reports Teuton Resources Corp. will carry out an exploration  
program on its Four J's property, located 40 km north of Stewart,  
northwest BC. The property was first staked by Teuton in 1983, and  
has been under option to third parties on three separate occasions.  
About \$750,000 has been spent on the property to date.

The 1999 program will follow up encouraging lead, zinc, silver  
mineralization discovered during a short program the previous year.  
A trench excavated through overburden southwest of a 1983 trench  
exposed stratiform lead, zinc, silver mineralization with the best  
grades yet reported from the property: 7.4% lead, 11.7% zinc and 6.1  
oz. silver/ton across a width of 3 metres.

Petrographic samples taken from the new trench have recently  
been analyzed by Steffen Robertson and Kirsten (Canada) Inc. (SRK).  
Intense deformation in the zone has made it difficult to determine  
whether or not the lead, zinc, silver mineralization is syngenetic  
(Sedex-VMS) or epigenetic (vein hosted) in origin. However, Ross  
Sherlock, Ph.D., of SRK concludes, "I think the textures seen in thin  
section No.1, combined with the band samples and the field  
relationships described, suggests that the mineralization is  
syngenetic. This indicates the potential for a deposit of significant  
size and value making it a worthwhile exploration target."

The initial 1999 work will concentrate on extending the  
stratiform mineralization along strike. Favourable results from such  
work could lead to a diamond drilling program. Funds for the  
program will come from debt settlements concluded with former  
optionees of certain of the company's properties in Mexico (as  
previously reported).

In a separate development, Teuton Resources was recently  
awarded \$8,268 in small claims court against defendant INFINITE  
RESOURCES INC. [INF-V] former 50% optionee of the  
company's Tennyson property located 30 miles north of Stewart,  
BC. A counterclaim by Infinite was dismissed. (SEE GCNL NO.65,  
6Apr99, P.8 FOR MEXICAN PROJECT INFORMATION)
