## **BIG VALLEY RESOURCES INC.**

[BV-ALBERTA], 13,596,765 SHS.

MINERALIZATION EXTENDED - Lloyd Tattersall, president, Big Valley Resources Inc., reports definition diamond drilling continues on the company's 100%-owned Lloyd-Nordik copper-gold property located 55 km east of Williams Lake, BC. Drill hole 96-64 is located about 10 metres from the surveyed boundary between Big Valley and Imperial Metals Corp.'s Mount Polley gold-copper deposit. Drill hole No. 96-64 was drilled 50 metres east of 96-59 which intersected 196.8 feet of 1.45% copper and 0.057 oz.gold/ton. Drill hole 96-64 intersected two well mineralized zones. Assay results of the zones are:

HOLE NO.	INTERVAL FEET	LENGTH FEET	COPPER %	GOLD OZ/T
96-64	295-367	72	0.65	0.019
INCL.	295-308	13	1.02	.038
	472-492*	26	.79	.03

\*DRILL HOLE TERMINATED IN MINERALIZED MATERIAL.

The host rock of the mineralization in both 96-59 and 96-64 is a felsic breccia healed with magnetite. This same favourable host

rock was intersected in drill hole 96-65, which is open in the western part of the Lloyd 2 Development Area, about 160 metres west of drill hole 96-64. Assays are pending for drill hole 96-66 and copper mineralization is visible in the breccia host rock.

On the BV claims, a ground magnetic survey has been completed over a geochemical survey grid. Results of the soil sampling and magnetic surveys will be reported when compiled.

Big Valley received all proceeds from an \$850,000 private placement of 850,000 units at \$1 per unit with a warrant exercise price of \$1.25 for two years. (SEE GCNL NO.140, 19Jul96, P.1 FOR PREVIOUS LLOYD-NORDIK PROJECT INFORMATION)
