KENRICH MINING CORPORATION

[KRC-V] 21,185,823 SHS.

COREY PROJECT UPDATE - Kenneth Trociuk, president, Kenrich Mining Corp., reports additional information on the newly discovered silver rich portion of the TV Zone at the 100%-owned Corey project located 70 km north of Stewart, northwest BC. Four trenches were cut into this zone and give the following results:

Trench 96-3: 5.2 metres (17 feet) true width averaging 0.021 oz.gold/ton and 11.84 oz.silver/ton. This represents a gold equivalent assay of 0.161 oz/ton.

Trench 96-4: 6.0 metres (20 feet) true width averaging 0.043 oz.gold/ton and 20.39 oz.silver/ton. This represents a gold equivalent assay of 0.298 oz/ton.

Trench 96-5: 5.6 metres (19 feet) true width averaging 0.036 oz.gold/ton and 27.64 oz.silver/ton. This represents a gold equivalent assay of 0.382 oz/ton.

Trench 96-6: 7.0 metres (23 feet) true width averaging 0.036 oz.gold/ton and 6.53 oz.silver/ton. This represents a gold equivalent assay of 0.118 oz/ton.

Gold equivalence was calculated using an 80: 1 silver:gold ratio. Diamond drilling of this zone has begun and results are expected in mid September. (SEE GCNL NO.164, 23Aug96, P.1 FOR PREVIOUS COREY PROJECT INFORMATION)
