## LEVELLAND ENERGY & RESOURCES LTD.

[LVL-V] 8,704,943 SHS.

CY PROJECT EXPLORATION UPDATE - Donald Coates, president, Levelland Energy & Resources Ltd., reports its exploration program on the Cy claims, located southeast of Stewart, northwest BC, is proceeding as scheduled and with preliminary findings viewed as encouraging by management. A number of surface samples have been collected for assay and all returned gold values ranging from trace to +1.5 oz/ton.

A strong shear zone was discovered on the property that is well mineralized and has been traced for over 120 feet before disappearing under the overburden. A grab sample from another zone returned values of 1.634 oz.gold/ton and 19.55 oz.silver/ton silver. The exploration crew will be focusing their attention to these zones as

well as searching for additional shear structures.

The Cy claims consist of about 3,600 acres and tie on to the south of the Clone property presently being explored by TEUTON RESOURCES CORP. [TUO-V] and MINVITA ENTERPRISES LTD. [MVE-V]. The Teuton/Minvita zone strikes northwest-southeast and their drill is positioned about 1,500 feet from Levelland's north border. Teuton and Minvita previously reported a gold discovery on the Clone property where a trenching program on a shear structure returned values of up to 3.59 oz.gold/ton across 18 feet and a diamond drill hole intersected 98.4 feet grading 0.36 oz.gold/ton and 0.09% cobalt. (SEE GCNL NO.155, 12Aug96, P.5 FOR PREVIOUS CY PROJECT INFORMATION)
