MINVITA ENTERPRISES LTD.

[MVE-V] 4,528,159 SHS.

CLONE DRILLING RESUMED - D. Cremonese, president of Teuton Resources and Minvita Enterprises has reported the phase two drilling program on the Clone property in northwestern BC has resumed. Approximately 600 metres has been drilled to date and the drill rig is currently on the fourth hole of the new program. This hole is testing the newly discovered H3 zone which is sub-parallel to the H2 zone and situated approximately 100 metres to the east.

The companies' technical advisors have recommended that 3,300 metres of drilling be carried out in phase two to test a 700 metre strike length of the H and S zones. A further 1,500 to 2,000 metres has been allocated for the H3 zone, the magnetic anomaly extending southeast under the ice and prospective targets outlined by the 1996 trenching.

All core from the phase one drilling program has now been shipped from the property for analysis. Results will be announced upon receipt. (SEE GCNL NO.152, P.1, AND OVERLEAF P.3, 7Aug96 FOR RECENT RESULTS).
