ENCOURAGING GOLD ASSAYS - Larry W. Reaugh, director, reports preliminary trench results from the 100% owned Marmot claims, (See Assay table and sketch overleaf P.4) located 20 km. southeast of Stewart, BC and 6 km. west northwest of Minvita Enterprises/ Teuton Resource/ Prime Resource/Homestake Canada Inc. "Clone project". Similarities of geology and structure between the "Clone" and "Marmot" are:

- Gold bearing shear zones with pyrite, arsenopyrite
- Stacked, parallel gold bearing shear zones;
- NW trending gold bearing shear zones hosted by L. Jurassic and esitic crystal and lithic tuff, and pyritic tuffaceous sediments;
- Higher grade gold shear zones occur near cross-cutting microgabbro dykes; and •Minor cobalt bloom.
