## BOOKER GOLD EXPLORATIONS LTD.

[BGE-V] 8,118,962 SHS.

CHAPMAN ZONE EXTENDED - J. Paul Stevenson, director, Booker Gold Explorations Ltd., reports current drilling on the Chapman Zone at the 100% owned Hearne Hill project 35 miles east of Smithers, north-central BC has extended the zone at least 35 metres to the southeast. Drilling to date on the Chapman Zone has indicated the breccia body contains high grades and covers a larger area than expected. The most recent intercepts within the breccia contain more visible chalcopryite than previously observed on the Hearne Hill property. Step-out drilling continues and assays will be released when available. (SEE GCNL NO.145, 29Jul97, P.2 FOR PREVIOUS HEARNE HILL DATA)
