## BIG BLACKFOOT RESOURCES LTD.

[BLF-ALBERTA] 4,666,667 SHS.

CARAMELIA PROJECT - John Chapman, president, reports Gold  
TO BE FARMED OUT Gold City Mining Corp. has signed a  
letter of intent for Big Blackfoot Re-  
sources Ltd. to earn a 50% interest in the Caramelia Gold project.

The project consists of 2,200 hectares of contiguous mineral lands east of Osoyoos, at Camp McKinney and Dayton Camp near the international boundary in south-central BC and 20 km northwest of Battle Mountain Gold Company's 1,800,000 ounce Crown Jewel gold deposit. Big Blackfoot can earn its 50% interest by spending \$815,000 on exploration and by paying Gold City \$105,000 in cash and 200,000 shares of Big Blackfoot over the next four years.

The project area has been a focus of gold exploration since the 1860s. The historical Rock Creek placer gold fields, are located adjacent to the project's lode mineral lands. The Cariboo-Amelia mine, which is a part of the project, was BC's first dividend paying lode gold mine. The mine started underground operations in 1894 and produced 137,000 tons yielding 82,000 ounces of recovered gold. The area geology is favourable toward discovery of more gold deposits, as seven km of contact between the Anarchist Group meta-sediments/ metavolcanics with Nelson Plutonic Complex felsic intrusives strike northwesterly across the project lands. This is the same rock contact that hosts the Crown Jewel gold deposit and the new Ket 28 gold discovery 10 km south of the Caramelia project.

Big Blackfoot is planning a \$250,000 diamond drill program for the project in 1997, to test established targets and to test extensions of known gold deposits.

The option agreement will be subject to the approval of each companies' board of directors and approval of regulatory authorities. Paul White is president of Big Blackfoot and a director of Gold City. (SEE GCNL NO.7, 10Jan97, P.3 FOR GOLD CITY MINING'S NEARBY OLD NICK PROJECT)
