### MINER MOUNTAIN DRILLING COMPLETED - James McLeod, president of

Big I Developments Ltd. and 50/50 joint venture partner Golden Kootenay Resources Inc., report the Copper Mountain Syndicate has completed a preliminary drilling program on their 9,700 acre property near Princeton, southwest BC. The five hole program indicated a large elongated mineralized skarn-porphyry zone with similarities to the nearby past-producing Ingerbelle deposit, part of the Similco copper mining operations.

The data from drilling has not been entirely compiled and analyzed, but initial results from two previously untested areas reveal copper mineralization over several hundred feet which returned values of up to 0.24% copper and 0.012 oz.gold/ton. Fieldwork will continue shortly on many mineralized zones found on the claim block. Further results are awaited. (SEE GCNL NO.95, 16May97, P.6 FOR PREVIOUS RELATED PROJECT INFORMATION)
