GOLD WIN VENTURES INC.

[GWV-V] 4,573,000 SHS.

NORTHWEST BC PROSPECT OPTIONED - Gold Win Ventures Inc. reports having been granted an option to earn a 100% interest in the Yeti Claim Group which lies in the Liard Mining Division in the Stikine Terrane in Northwestern BC. Terms were not disclosed. So far, six known alteration zones/quartz veins have been found on the property and early sampling has shown some rather exceptional values.

The First Four Zones form a north/northeast trending linear occurring over a wide area as structurally controlled veins that pinch and swell for three km. Samples from these veins returned gold values of up to 2.15 oz/ton and copper values of up to 1.4%.

The Main Zone: A select sample from the main zone returned 14.9 oz. gold/ton, 20 oz. silver/ton and 2.7% copper. Other samples taken from the main zone, where ladder veins occur (up to two metres wide), have returned 0.1 to 1.2 oz. gold/ton and up to 1.9% copper. These ladder veins occur between two or more North-trending quartz veins. Work done to date on the Yeti claims indicate high copper and gold values over a wide area, at least 1,200 by 1,600 metres.

The company has over \$1,100,000 for exploration and investor relations programs. Gold Win has planned a summer drill program.
