## SEDEX MINING CORP.

[SDN-V] 21,221,096 SHS.

**IRISHMAN DRILLING COMPLETED** - Richard Hughes, president, Sedex Mining Corp., reports Kennecott Canada Exploration Inc. has completed its 1997 drilling program on the Irishman property near Cranbrook, southeast BC. Sedex holds a 100% interest with Kennecott able to earn a 50% interest by spending \$2,000,000 over four years and a further 10% by advancing the project to a production decision.

Kennecott's diamond drill hole K-97-04 was drilled to a final depth of 914.4 metres (3,000 feet) and collared 150 metres from hole K-97-03 which intersected 2.55 metres of 9.65% zinc, 5.82% lead and 49.4 grams silver/tonne at about 505 metres (1,650 feet). In general, the core from hole K-97-04 contains noticeably more sphalerite-galena fracture type mineralization in the upper 750 metre (2,500 feet) than was encountered in hole K-97-03. Because of unanticipated hole deflection and faulting, it is unclear if the extension of the mineralized horizon seen in hole K-97-03 was intersected. Geochemical and structural studies are planned.

Kennecott has lined hole K-97-04 in anticipation of down hole geophysical logging next year. (SEE GCNL NO.206, Oct.27/97, P.4 FOR PREVIOUS IRISHMAN PROJECT INFORMATION)
