## WEYMIN MINING CORP.

[WEY-V] 11,756,162 SHS.

**BC DRILLING UNDERWAY** - Geoffrey Trafford, president, reports Weymin Mining Corp. has begun diamond drilling at the McKinnon Creek project located near Revelstoke, eastern BC. F. Boisvenu Drilling Ltd. mobilized its first drill onto the property Oct. 2/97 and coring on the first hole, S-97-1 began Oct.8. The target of the first two holes will be the up-plunge extension of the Yellowjacket Zone, to be followed by additional drilling on the southeast extension of the Main Zone, weather permitting.

Weymin also reports arrangements for the taking of a 100 tonne metallurgical sample from the Main Zone are complete. The underground contractor, Amecus Consultant & Contracting Inc., is on site and extraction of the sample will start shortly. Extraction and handling of the sample will be supervised by Beattie Consulting Ltd.

The McKinnon Creek project hosts two major known deposits; the Main Zone, consisting of 3,600,000 tonnes (in all categories) grading 7.24 grams gold/tonne, 81.0 grams silver/tonne, 3.93% zinc and 3% lead, is a massive sulphide deposit, open down dip and along strike to the east and west; and the adjacent Yellowjacket Zone, consisting of 1,000,000 tonnes (in all categories) of 52.5 grams silver/tonne, 7.09% zinc, and 2.47% lead, is a strata-bound carbonate hosted zinc lead deposit, open up and down plunge. Weymin holds an option to buy a mining lease covering the property. (SEE GCNL NO.135, 15Jul97, P.5 FOR PREVIOUS MCKINNON CREEK PROJECT INFORMATION)
