CAPELLA RESOURCES LTD.

[CPS-V] 3,452,104 SHS.

STUMP LAKE ASSAYS RECEIVED - Brian Gracey, director, reports
Capella Resources Ltd.
has received two geochemical assay results from its 100% optioned S
claim group located to the formerly productive Stump Lake Camp 40
km northeast of Merritt, BC. Capella can earn a 100% interest by
paying \$20,000, issuing 100,000 shares and spending \$200,000 on
exploration over two years.

Two quartz grab samples collected from the South Zone of the S
claim group returned 1.2 and 1.8 oz. gold/ton. These samples also
contained silver values of 4.8 and 4.3 oz/ton, respectively. These
and other surface samples contained mercury values, an indication of
increasing gold values to depth and a potential bonanza zone of a
gold epithermal system to depth. Capella is completing fire assays
on the samples to confirm the results.

The gold-bearing quartz samples and others were split prior to
submission for analysis with half being retained by Capella. (SEE
