## MOLYCOR GOLD CORP.

[MOR-V] 8,403,193 SHS.

MOLY PROJECT FARMED OUT - Larry W. Reaugh, president.  
reports Verdstone Gold Corp.

and 50/50 joint venture partner Molycor Gold Corp. have entered an agreement for Merryth Resources Inc., a private company, to earn a 49% interest in the Tadpole Lake molybdenum property located 27 km northwest of Kelowna, BC. SEE MAP OVERLEAF P.3. Merryth may earn its interest by paying \$15,000 in option payments and spending \$250,000 on exploration over the next two years.

The Tadpole Lake property, located adjacent to the east of the Flap gold property, contains a quartz stockwork at least 1,000 by 1,500 metres. The Moly soil anomaly are centred on this stockwork and cover an area greater than 1,000 by 2,500 metres. Moly and traces of pyrite occur with pink secondary K-feldspar in quartz veinlets. Percussion drilling to a 300 foot depth by Cominco Ltd. in nine widely spaced holes in 1978 showed the favourable quartz porphyry rock at depth in a low grade cap ranging between 70 and 300 feet thick. Significant intersections are:

HOLE NO.	INTERVAL FEET	LENGTH FEET	MoS <sub>2</sub> %
DP-78-2	230-250	20	.097
DP-78-3	90-270	180	.105
INCLUDE	90-130	40	.214
	210-230	20	.272
DP-78-4	190-200	10	.100
DP-78-7	160-180	20	.114

Merryth plans a diamond drilling program later this fall. (SEE GCNL NO.177, 15Sept97, P.5 FOR DOBBIN PROJECT DATA)
