BOOKER GOLD EXPLORATIONS LTD.

[BGE-V] 8,544,398 SHS.

THIRD MORRISON DRILL - J. Paul Stevenson, CEO, Booker Gold HOLE ASSAYS RECEIVED Explorations Ltd., reports assay results have been received from the third hole drilled on the Morrison porphyry copper-gold deposit. The Morrison deposit is under 50% option by Booker Gold from NORANDA INC. [NOR-T, M] and lies adjacent to Booker Gold's 100% owned Hearne Hill deposit, 65 km northeast of Smithers, BC.

SEE DRILL HOLE MAP OVERLEAF P.1. Results from the third hole are as follows: NQ diamond drill hole 98-MO-3, core length 101.8 metres (330 feet), dip 45°, bearing 090°.

INTERVAL METRES	LENGTH METRES	LENGTH FEET	COPPER %	GOLD GR/T	SILVER GR/T
3.0-101.8 INCLUDES	98.8	320	0.60	0.27	1.73
3.0-25.7 INCLUDES	22.7	70	.67	.31	2.43
96.0-101.8	5.8	20	.70	.36	2.16

Drill hole 98-MO-3 was collared 90 metres east of drill hole 98-MO-2 (0.50% copper and 0.24 grams gold/tonne over 374.5 metres or 1230 feet). Drill hole 98-MO-3 was drilled as a twin to Noranda's drill hole 20 (DH 20), drilled in 1967. The hole was well mineralized throughout and ended in 0.60% copper.

Copper grades in 98-MO-3 compare closely to copper grades in DH 20. However, grades in 98-MO-1 and 98-MO-2 averaged significantly higher than copper grades in nearby holes. Additional twinning of older drill holes will be necessary to determine the accuracy of copper grades from previous drilling. The gold and silver grades are of particular significance as they were not initially assayed during the Noranda drilling programs.

Booker Gold will complete a fourth deep vertical drill hole on the Northern Zone of the Morrison deposit to determine copper and gold grades beyond the recently established vertical depth of 275 metres or 900 feet. (98-MO-2).

Booker Gold also reports the appointment of First Nations Liaison Officer (FNLO), Ted Williams Jr., of Burns Lake, BC. Mr. Williams has been directly involved with Booker Gold's exploration activities since 1996. As Liaison officer, Mr. Williams will report directly to the CEO of Booker Gold on an matters of concern to the people of the Lake Babine Nation. He will also notify the band office and Chief on each upgrading of permitting. The Liaison officer will keep trapline holders aware of an aspects of exploration, and will ensure all members of the community have access to information pertaining to the project. In addition, Mr. Williams will actively seek to employ First Nations people on behalf of Booker Gold and will meet on a regular basis with the site geologist and environmental scientist to ensure he is current with the program underway. He will also attend community affairs and conferences as a representative of Booker Gold. (SEE GCNL NO.32, 16Feb98, P.1 FOR PREVIOUS MORRISON PROJECT INFORMATION)
