

Aylwin Creek

8/8/13

from VAP

Int. Bx pipe - Northerly plunge? - cuts gts

late ppy, a younger fs ppy and the Rossford(?)

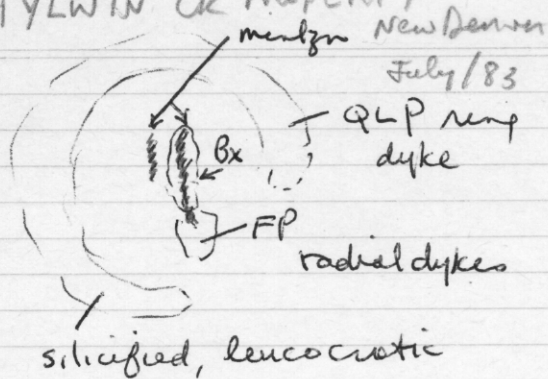

CR (argate ppy + ^{some} cherty, tuffac. sed.

Enclosed by Qtz late ppy ring dyke

Whole thing is a roof pendant in the Nelson Batholith

Aylwin

AYLWIN CK PROPERTY

BRECCIA

- matrix biotite, ^{anhydrite} later
- epidote, actinolite,
- pyrite, magnetite,
- (pyrrhotite)
- cpy - local anhydrite, gypsum
- disseminated pyrite
- in matrix may be early
- late quartz tourmaline veins
- late calcite, etc.

molysdenite

in quartz stockworks
in pre-breccia QLP
(quartz latite porphyry)

PLAN WITH LOCATION OF DRILL HOLES

CHRIS BATES — MALKSOPE INLET. — re BP Gold
Property N end of Island — check to
see if it is active in September
(Brian Martin)

~~Aylwin Creek~~

Point discord

error — it's
Trygve's
sample

rest of fractions
ready to go

Pb ~~avg~~ 108

Pb ²⁰⁷ 121½

Pb ²⁰⁸/₂₀₆ 399½

90-100 Ma
inheritance like
Kuskanox

Proterozoic Pb in ch
apparently.

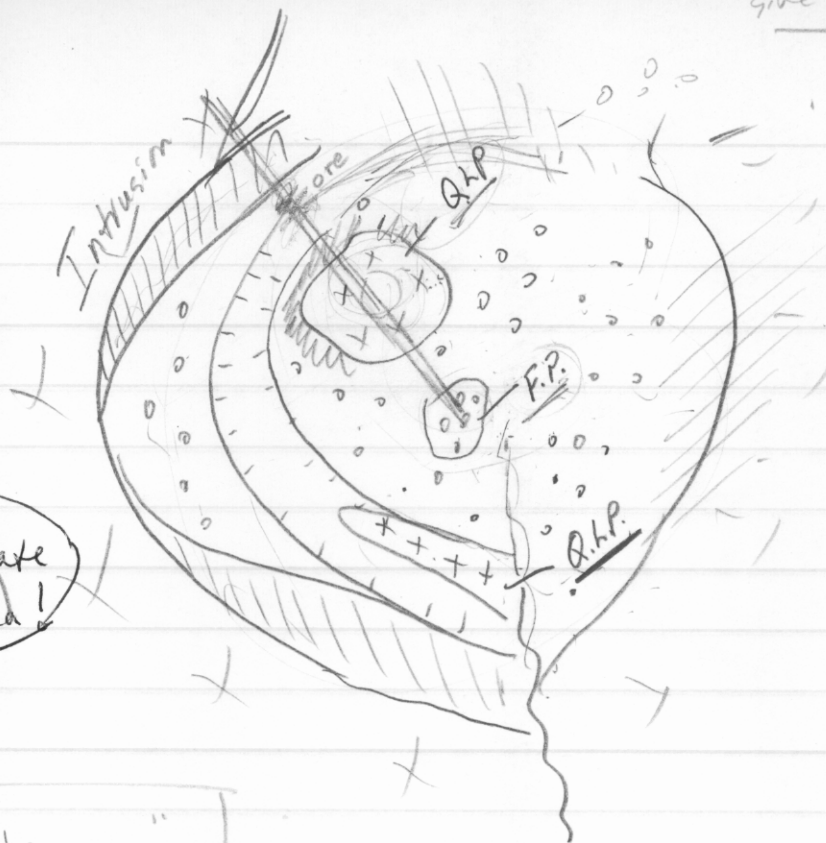

FIPKE
Methylene
Iodide

only — then
to UBC

to do
size up & mag.
SP splitting
— (included in the
price of the
analysis)

give back to Trygve *

Aylwin Ck

* Zircon date
90-100 Ma!
wrong

"Diatreme"

- ① Nelson Bath
- ② Rossland Volc
- ③ Co-magmatic - Q.P.
- Cu-Mo mineral.
- ④ Brecciation -
- Plutonic explosion
→ anhydrite - magnetite
- * ⑤ Diabite - Au - Copper
- ⑤ feldspar porphyry

- K-spar (pink)

* albitic? pot

F.P.

- Potassic / biotite
- silicified

no Q-Mo vein

Nelson Bath - 178 oldest

188 Ma [J.H.]

Julia

Q.P. - altered - (Potassic?, silicified) - ~~Min~~ Mo - Qtz vein
