Subject/Response

When

Followup of RAS Survey

Cairnes map - Slocan

Roof pendant ^{cut by felsic} intrusions

Ringed by Ag (in batholith + younger)

Were looking for MoS₂

other showing in it L.H. (Andorex)

Roof pendant

Preserved volc centre?

Gold System + felsic int.

Older than Nelson bath

Volc Rocks

Bas - And Pyroclastics

- Rossland? - Slocan??

K/Ar Nelsonages

local aug py ^{to} Kaslo?

- reset -

Thesis - Kevin Heather

Should be finished now

Ratcoo 11 gm Au 170 Au

some silver

A lets

Follow 'shear zones' + act.

heterogeneous bx

Bx frags

Bio Hf's / Hydro bio / + another

with felsic
intrusions

second bio - all over-
printed

1979

Coincident no W F anomaly - Looking for MoS₂

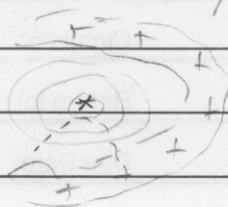

& MoS₂ occurs in the felsic porphyry

Dick Woodcock ^{after} Staked, he worked on it

file - Aylwin

Seq. Subject/Response When

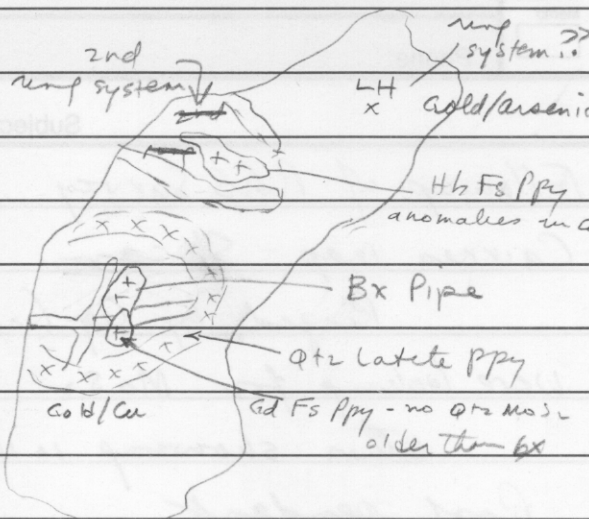

Sampling defined bulls-eyes

*Target

Complex
ring dyke
radial dykes

Cu w F high; Mn low
a SW U.S. pyro MoSe props

3(?) systems - but different
levels of exposure

300 x 200 m @ surface / pipe
70-75° N plunge

major structures N/S + NW/SE may cut locations

Andorax's LH prop

Noranda has the
option now

- 55000 Tonnages, 8 1/2 gm of Au
in silic shear (arsenicol)
- 500 m drift 700 m drilling

LH mapped carefully by Dome Petrol. - should be
in assessment reports -

Russ saw crackle bx

Relationship of Kaslo/Stoen? Phone Russ

Garnet anhydrite

Bx - mullite in vugs - Bx axis

chl / actinolite

Drilling from ~1200 m

deepest hole to 500 m level

hemiprophylus

post - mullite
