$^{207}\text{Pb}/^{204}\text{Pb}$

$^{206}\text{Pb}/^{204}\text{Pb}$

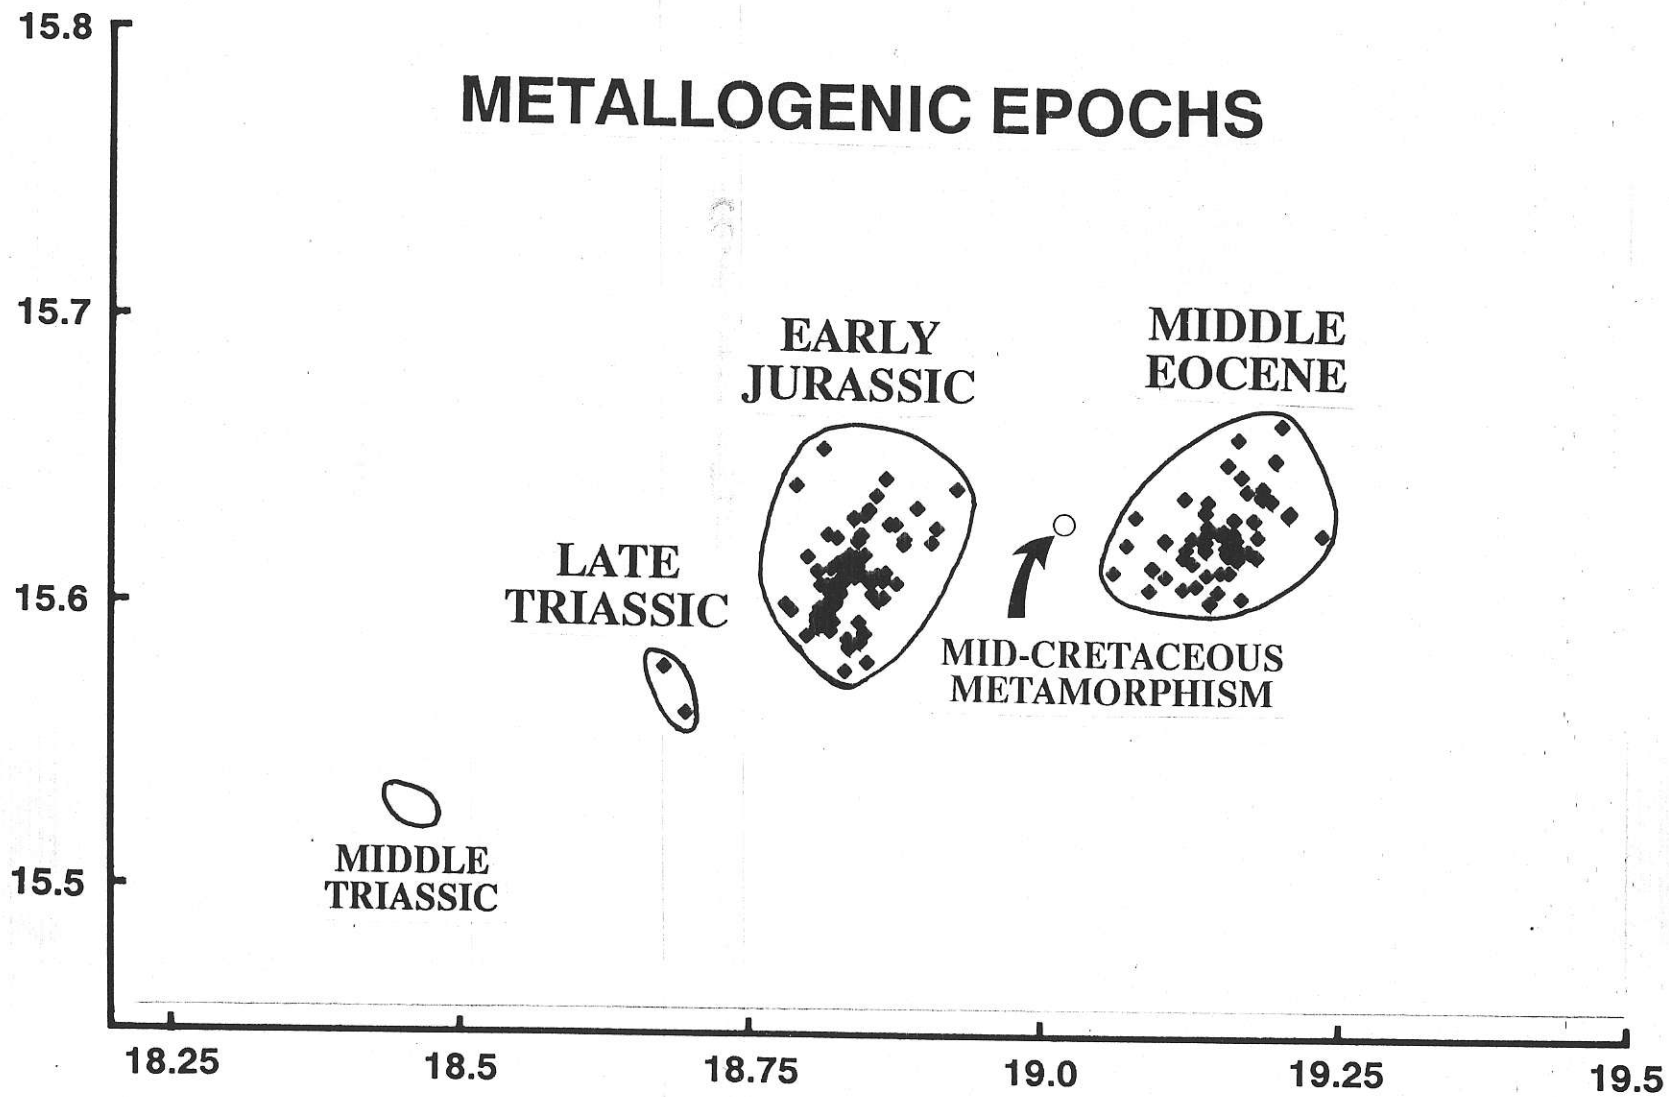

I found these intervals of the X and Y axes ① gave me the coverage I needed for the Mesozoic & Tertiary, ② Produced circular clusters (rather than ovals), and ③ gave a good shape for a 35 mm slide.

ESKAY CREEK IN PHANEROZOIC - *Field for Cambrian to Present.*  
*~600 Ma.*
