Taxi Drive to Mine Gate - ~16 km
\$20 - running out of gas

1) 15 minute walk to office bldg
from locked main gate

2) another gate at office bld with
locks to prevent it swinging up

NB two locks !!

3) dch wire and exploration office
- some unusual samples
in front
- core in good shape

DURABLE WATERPROOF

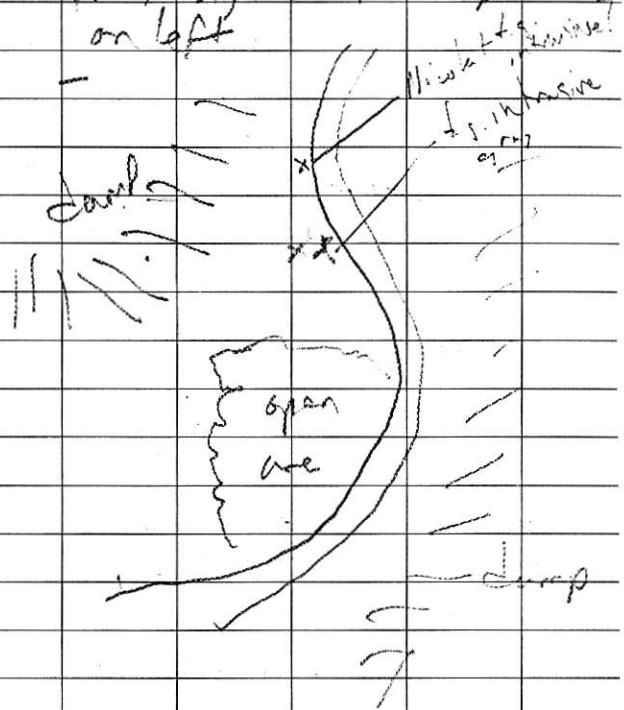

A4 - walked 5 minutes
to ~~over~~ view of
pit #3 - looking south
- shut down in mid-flight
- holes drilled but
not blasted, too mineralization
concess
- felsite dykes (cretaceous)
cut light gray Niobe to
west and Wolfe formation
bedded tuff / siltstone

Photo 16 - looking SSE
- felsite dykes cutting
both Niobe & Wolfe

A5 - walked 10 minutes to
pit #2 overlook
on south side
- can't access west
end
- lots of malachite
stain on rock
dumped just opposite
core shack about pit #2

-also saw ksp or vent with
apuhite? in rubble

Δ6 - Coming up road
from main gate, open
clearing on left and
first sight of dump
on left
