Dike Rock:
F.P. - Feldspar Porphyry
H.P. - Hornblende Porphyry

LEGEND

- Cream Rock
- Granite
- Diorite
- Greenstone
- Silicified wallrock breccia
- Vein quartz
- Shear
- Diamond Drill hole

Note: All vein-data from sections beyond caves have been obtained from old company plans, elsewhere the mapping has been done by the writer.

Drafting note: Excepting portion of silicified wallrock breccia below diagonal "auxiliary" pattern in some of the veins in the E.W. drop.

Fig. - Wayside (L.A.P. Mining Co.). Mine plan, showing stoped areas & geology on levels & in diamond drill holes
