Enclosed for your information are a number of location maps detailing TEUTON's (TUO) key land positions along with the various discovery zones in relation to Seabridge (SEA), Silver Standard (SSO) and Pretium (PVG). Of particular interest is TUO's HIGH PROPERTY which borders PRETIUM's Brucejack/Snowfield discovery to the south. PVG raised over \$250 million for the acquisition of this property from SSO. PVG will spend in excess of \$50 million on drilling and further exploration this season and take the property to pre-feasibility.

For the Brucejack/Snowfield deposit, measured and indicated gold comes in at 27.8 million oz. and silver at 157 million oz. (see enclosed tables). This will be a \$3.5 billion project. TEUTON's HIGH property is strategically positioned directly south of Pretium's Brucejack discovery (500 metres). All indications are that the anomaly which runs north to south extends into TUO's HIGH property. TUO will be initiating a very aggressive program this season on the HIGH property. For a visual presentation on the HIGH property, please go to Teuton's home page at www.teuton.com and click on the d"High Presentation". In addition to the this, there is an excellent detailed presentation on the Brucejack/Snowfield discovery by Robert Quartermain, president of Pretium—see www.pretium.com. For further information on this or any other projects, please call Gary M. Assaly, Investor Relations at 1-800-879-2333.
