

Sample Examination ReportM 92-9(3)Submitted by: R.V. Kirkham Date submitted: Jan. 13/93Title of study: Sulphurets Project No. 700059Sample description: Pyritic, sheared, altered volcanic rockLocality: Treaty Glacier, B.C. KQ-91-127A

Information and data required:

X-ray identification grey metallic mineral(s)?

## Results:

Have "grey metallic" minerals are neither grey nor metallic. They are brownish with a light brown streak and are definitely not metallic. I checked 7-8 grains with a needle → all gave the same light brown streak. ∴ I made one powder mount to establish the mineral's identity

"grey metallic" = Rutile x-75574
