Dear Rod:

Further to our phone conversation of Thursday morning regarding Sulphurets, I will attempt to get rejects from 1988 holes which traversed the UTC. This will be supplemented with 1989 holes drilled from U/G. Maps will accompany.

An attempt will also be made to locate rejects from 1 good intercept from the Golden Marmot area.

I will review with Fred what he can find in his file regarding correspondence with you. In the meantime, I would like to see your data on the Electrum to Sulphurets Glacier traverse and the traverse in the Mitchell area where you found indications of a new bulk gold zone.

For simplicity, fax material to the Vancouver office, the most pragmatic approach given our phone at Brucejack.  
Both numbers follow:

Vancouver: (604) 689-5041  
Mine: (604) 662-0145

Regards,

Barry Max
