

**LEGEND**

- 1 Tertiary volcanics
  - 2 Granite, epife
  - 3 Granodiorite
  - 4-A Quartz Diorite, typical
  - 4-B Quartz Diorite, feldspathic, transitional between 4-A & 4-C
  - 4-C Diorite to mafic quartz diorite
  - 4-D Quartz Diorite, aliothid
  - 5 Conglomerate to finely banded quartz-chlorite schist
  - 6 Interbanded crystalline limestone and carbonate-chlorite schist
  - 7 Skarn
- 
- Outcrop, outcrop area
  - Foliation
  - Schistosity
  - Joint, sheared joint
  - Shear zone
  - Major fault, assumed
  - Contact, defined, assumed
  - CLAIMS RECOMMENDED FOR ABANDONMENT
- 
- Drag fold, trend of fold axis
  - Road, passable by Jeep
  - Stream
  - Lake, pond
  - Presence of copper minerals (generally trace malachite)
  - Outcrop number, from field notes
  - Diamond drill hole and number
  - APPARENT OPEN FRACTURES
