

LEGEND

- 1 Tertiary volcanics
 - 2 Granite, apile
 - 3 Granodiorite
 - 4-A Quartz Diorite, typical
 - 4-B Quartz Diorite, feldspathic, transitional between 4-A & 4-C
 - 4-C Diorite to mafic quartz diorite
 - 4-D Quartz Diorite, silicified
 - 5 Conglomerate to finely banded quartz-chlorite schist
 - 6 Interbanded crystalline limestone and carbonate-chlorite schist
 - 7 Skarn
-
- Outcrop, outcrop area
 - Foliation
 - Schistosity
 - Joint, sheared joint
 - Shear Zone
 - Major fault, assumed
 - Contact, defined, assumed
 - Drag fold, trend of fold axis
 - Road, passable by jeep
 - Stream
 - Lake, pond
 - Presence of copper minerals (generally trace malachite)
 - Outcrop number, from field notes
 - Diamond drill hole and number
