Dear Rudy;

I am writing to thank you for the tour of your REDGOLD mineral claim group in Horsefly. As I mentioned at the time I feel that the property needs a bit more work on it before CFC could become interested. A property at such a grassroots stage has a difficult time competing with more advanced projects for funding. We would be most pleased to review the property again in 1985 if there is any new work done on it.

Thanks again for the tour and for considering Corporation Falconbridge Copper. I hope you will consider CFC with other other properties you might acquire.

Yours truly,

A. J. Davidson
Senior Exploration Geologist

Dear Mr. Durfeld;

I reviewed with interest the material you sent us on Redgold Resources' REDGOLD Mineral Group near Horsefly, B. C.

Corporation Falconbridge Copper is presently engaged in base and precious metal exploration throughout southern British Columbia and the Quesnel Belt is of some interest to us.

I hope to be in the Quesnel-Horsefly area in August or September and would like to visit your property at that time if it is still available. I will contact you by telephone sometime in August to arrange a visit.

Thank you for this submission. Hope to see you soon.

Yours truly,

A. J. Davidson
Senior Exploration Geologist
