Re: Athelstan-Jackpot Quarterly Report - First Quarter, 1991

Dear Chris:

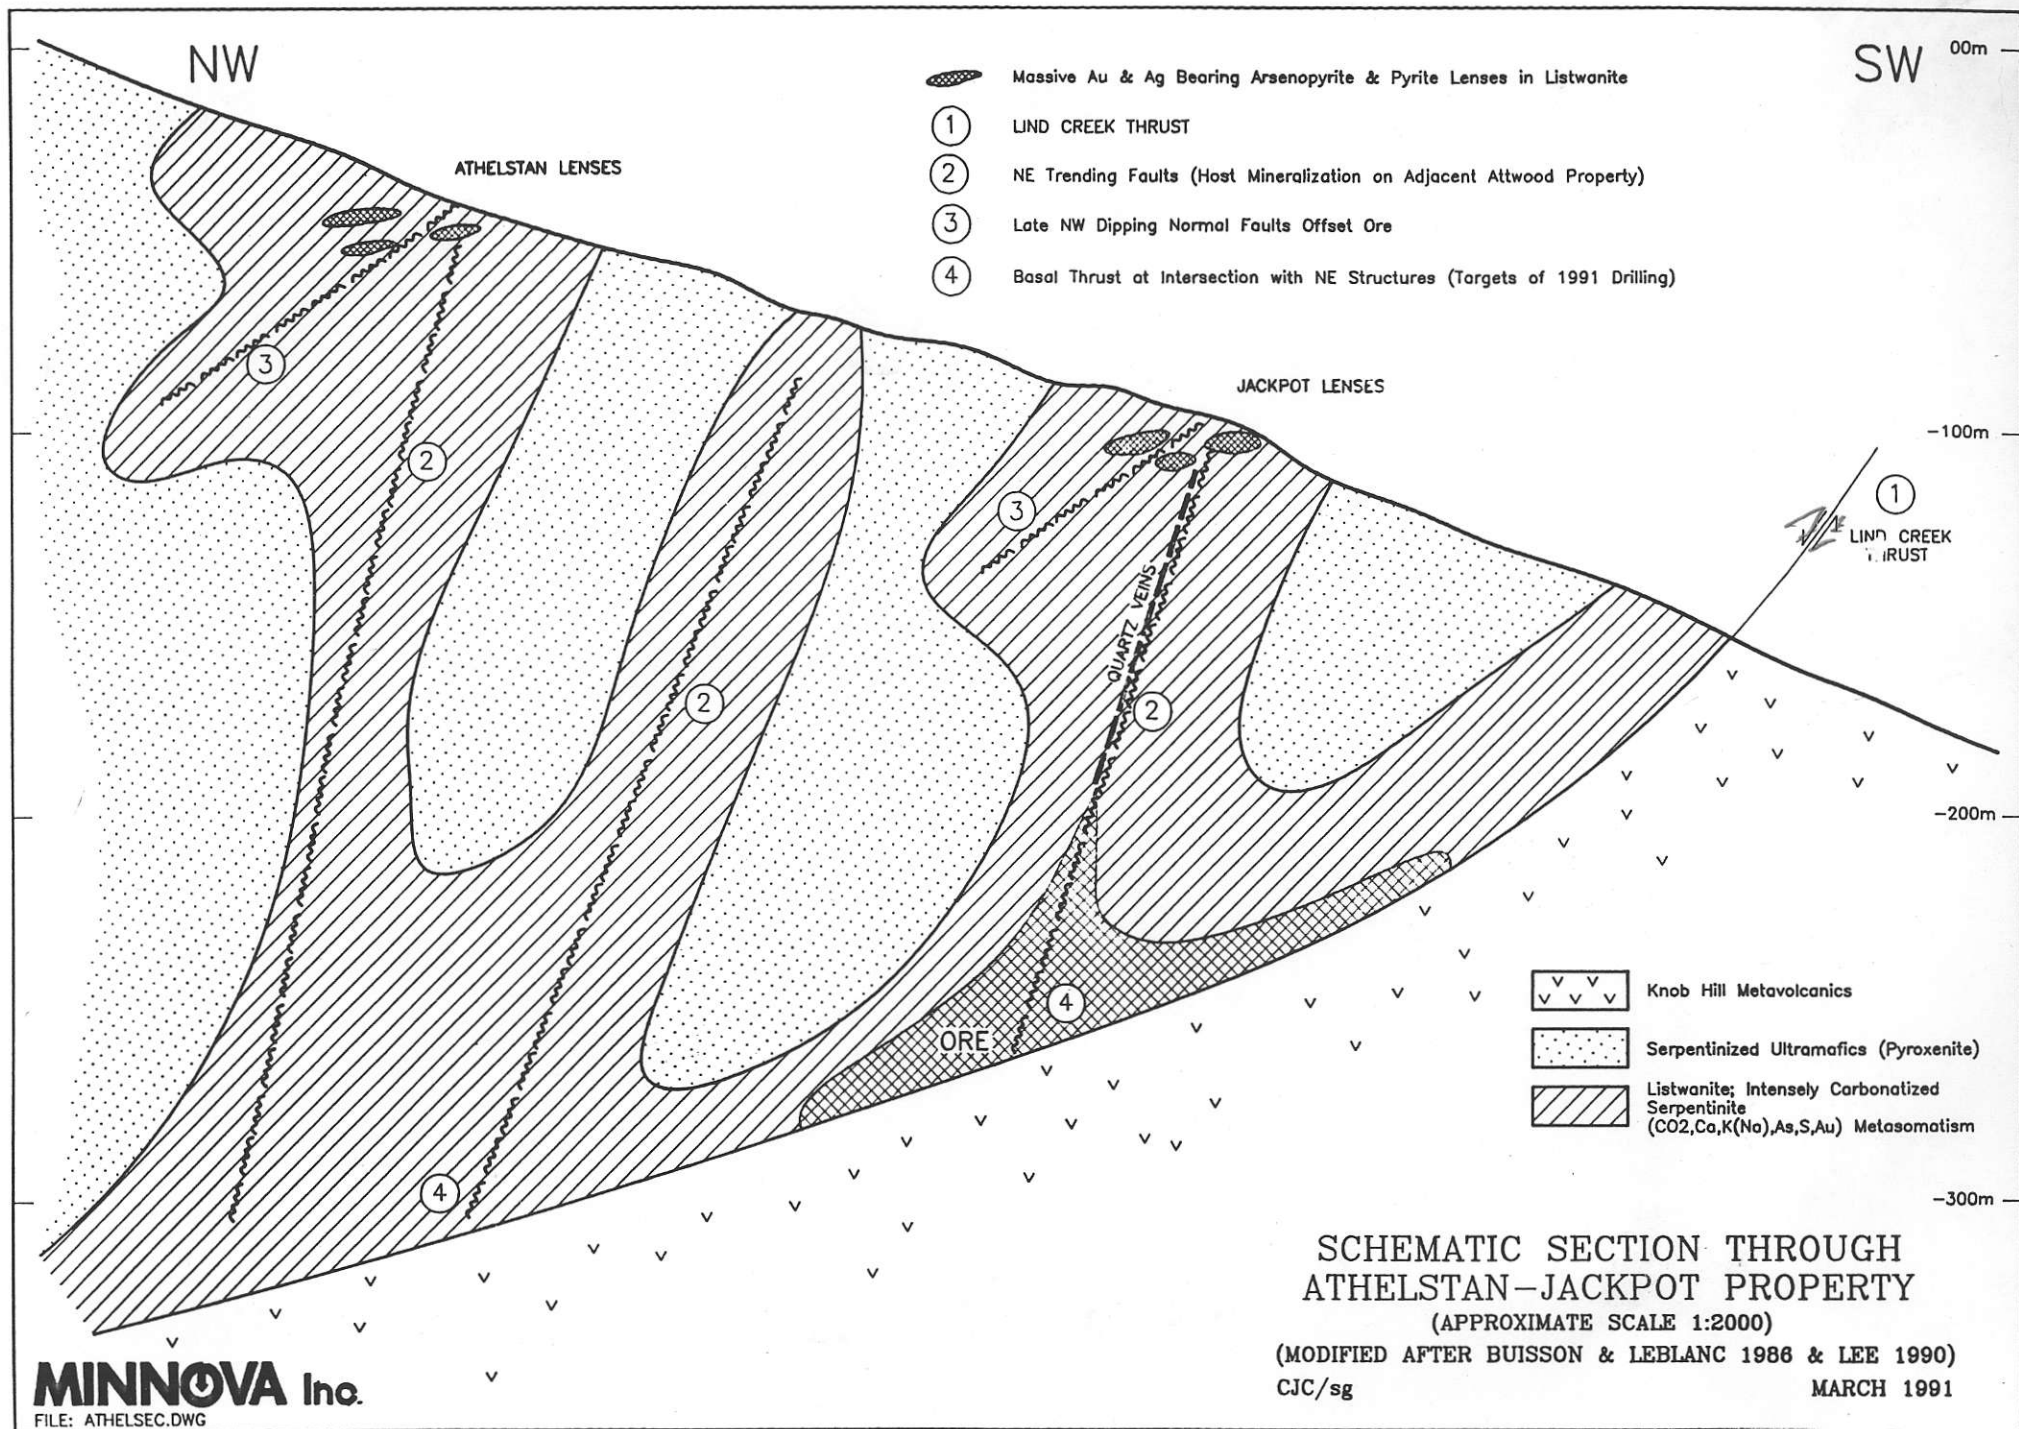

No field work was done during the first quarter of 1991 (January 1 to March 31, 1991). A "working" conceptual model has been devised to help guide exploration for 1991 (see attached drawing). Notices of Work for the 1991 program have been filed. Mapping of the remaining portion of the grid is tentatively scheduled for late April followed by a proposed 1100 metre drill program in May.

Yours truly,

Cameron J. Clayton

Encl.
