

# Seven Mile High Resources

824003

PRESS RELEASE

SEPTEMBER 8, 1987

\*\*\*\*\*

Seven Mile High Resources Inc/Inco Gold

\*\*\*\*\*

Progress report on the Vault Claims near Okanagan Falls B.C.

\*\*\*\*\*

Assay results have been received from the first two diamond drill holes of the current program designed to follow-up on the previously reported results in holes 72408 (the discovery hole) (Best intersection 0.31 (oz/st) Au over 28 (ft)).

Holes 72414 (-63°) and 72415 (-62°) were drilled 345 feet east and 215 feet south respectively of hole 72408. Both holes were drilled from south to north. Gold values are present in quartz veins cutting silicified pyroclastics of the Eocene Lower Marama Formation.

The longer mineralized intervals are noted below;

### HOLE 72414

	Intersection (ft)	Width (ft)	Au (Oz/st)
	1309 - 1349	40	0.04
Including	1341 - 1349	8	0.09

## Seven Mile High Resources

### HOLE 72415

	Intersection (ft)	Width (ft)	Au. (Oz/st)
	1171 - 1191	20	0.05
	1205 - 1278	73	0.05
Including	1243 - 1244	1	1.76
or	1243 - 1248	5	0.46
Including	1272 - 1278	6	0.13
	1297 - 1312	15	0.03

Diamond drilling is continuing with the third hole just completed and the fourth and fifth well on their way.

Results will follow as soon as they are available.

The mineralization is of Ore grade and has the potential for very significant tonnage.

This Press Release was prepared on behalf of the Board of Directors by the undersigned, who accepts full responsibility for its contents.
