

075/32 - one major structure
 - from plan of old workings, Jackpot slope has Two major "trends" $\approx 320 + 075$
 - using the 2 planes found in field, the intersection of the 2 planes trends towards 089° with a plunge of 09° . From readings, trend and plunge of Jackpot ore bodies was $10-40^\circ \rightarrow 090^\circ$
 \therefore intersection of the two planes
