Mr. Gordon A. Keevil  
Western Pacific Energy  
1280 - 999 West Hastings Street  
Vancouver, B.C.  
V6C 2X2

Dear Mr. Keevil:

Further to my report on the GWP claims, Toodoggone area, dated May 1, 1985, Mr. Ray Cottrell has requested a ranking of the subject claims.

Currently, Western Pacific is involved in a joint venture with respect to 16 claims comprising 222 units, which will require an annual expenditure of \$44,400 to maintain them in good standing.

Ignoring location relative to SERFM's Lawyers property and Baker mine, and based solely on available geological and geochemical information, the following claims might be considered expendable:

GWP 11	3 units
12	6 "
13	6 "
14	12 "
15	12 "
17	12 "
25	18 "
26	18 "

Excluding these claims, a total of 135 units would be left in the current joint venture for which assessment requirements of \$27,000 would be due prior to January, 1986.

A farm-out of the so called expendable claims should be feasible, considering their excellent location adjacent to the Lawyers property (see attached sketch) and the current interest in the Toodoggone area.

N.C. Carter
