Dear Rob,

**RE: FIREWEED MINERAL PROPERTY**

**OWNER:** Mansfield Minerals Inc.  
Contact: John Leask  
Phone: 681-4462 Fax: 681-0180  
**LOCATION:** NTS 93M/1W: 54km northeast of Smithers  
LAT. 55°05'N; LONG. 126°25'W

Enclosed is the information package given to me by John Leask of Mansfield Minerals Inc., who hold the Fireweed Property mineral claims. Please return this package to Mansfield's office once you have no further need of it.

Although the outlined resource is fairly small at present (437,000T @ 13.3 opt Ag, 2.7% Zn, 1.6% Pb) this property appears to have good exploration potential remaining. Equity would have liked to option the property back in 1989, but somehow never did. We looked at it briefly from a custom milling point of view recently, but decided it would not be worth the effort converting our mill. As far as an option agreement goes, Equity seems to have thrown in the towel on any further plans to carry out exploration in the foreseeable future.

Anyway, the Fireweed is a good prospect, and I believe Mansfield would cut an easy deal. See what your people can do with it. Good luck.

Yours Truly,  
EQUITY SILVER MINES LIMITED

T. J. Wall, Geologist
