PROGRESS REPORT FOR PUBLICATION

Attached is a chart showing the progress of diamond drilling on the companys Blackdome Mountain gold prospect, located about 65km west of Clinton, B.C. Assay results for holes No. 1 to No. 6 have been received and are shown on the chart.

The mineralized zone has been intersected in holes 7, 9, 10, 11 and 12 but no assay reports have been received. There are two drilling machines on the property and it is expected that about 30 drill holes will be completed by the end of the field season in early October.

On Behalf of the Board

Albert F. Reeve
President
