Description

Gold and silver past producer with reserves in the \$1,000,000 range, located on Vancouver Island, British Columbia, Canada. The present gold resource is estimated at over \$1,000,000.00 at \$400/oz gold. (Assessment reports 9639, in BC government files.) Geological reports document the location of high samples, targets for extension of known gold mineralization, and indications of additional gold mineralization. In the 1990's exploration by a major mining company discovered a spectacular new gold deposit in this general area. Full selling price is US\$20,000. For further details and location maps please see our web site.
