Brett

July 15/94

Dom:

Enclosed are several drill sections from the Brett property. I have included sections from each explored (drilled) zone with emphasis on the Main Shear zone. Sections 7+30<sup>N</sup> to 9+24<sup>N</sup> cover the area proposed for underground bulk sample testing. Section 13+11<sup>N</sup> represents the northern extension of the Main Shear zone where the style of mineralization differs significantly from the area to the south.

The drill hole plan shows the drill holes for which I have sent sections. I hope this information is of assistance to you.

Should you require further information please do not hesitate to call

Regards  
Warner Greenwald
