Dear Ben:

Re: Kerr Gold Property

With regard to your letter dated May 28, 1985, I have included a couple of write-ups you might find useful. Also, I would suggest looking at Assessment Reports 5921, 8420, 9435, 9568, 10,268, 10,553 and 11,667 for the Sulphurets area in particular.

Of course, I would be prepared to offer on-site comments if we could work out a convenient travel arrangement to the property from Stewart. I could easily drive up to Stewart and fly in for a day. Please let me know if we can arrange something.

Good luck.

Yours truly,

Tom Schroeter,
District Geologist.

Dear Ben:

Please be informed that I will be away from the office until
Friday, June 28th and will not be able to respond to your letter
until that date.

Thank you.

Yours truly,

Re: KERR GOLD - Sulphurets Area - N.T.S. 104B/8

Dear Tom:

I will be working this season up in the Sulphurets Area for Brinco. You have worked extensively in the regions around Stewart and are familiar with the major geological twists and turns in the area. Would you send me some information you have on the styles of mineralization, geological setting, genesis, etc., that you have for mining camps north of Stewart. I am willing to cover any copying charges and postage if required.

This will be the first detailed mapping of the Kerr prospect. I need some additional information to place it in context with the regional setting.

Thanks for your help. Perhaps we will run into each other this summer.

Good luck.

Dear ~~Mr. Hewton:~~

Just a note to say thanks again for your hospitality and interesting discussions when we visited your Kerr property recently.

Please extend our thanks to Brian Butterworth, Mike Jerema and the rest of the crew.

Happy drill results on the property!

Best regards,

Bill for
