FYI: Nucanolan Resources Ltd. (an Ontario company) appears to have optioned the Lara property, although I haven't seen an agreement announced yet. The company plans to do some work this year. By the look of it, it will probably be orientation geophysics, geochem etc. near the Lara adit. However, they are talking about a 5-8 hole program this fall.

I would guess at \$200,000 for now.

Good to see some activity there!

Robert

Priorities for coming week:

Preparation of materials for Victoria meeting on 28-30th October.
Confirm status of outstanding active projects
Christy in Victoria
Industrial Mineral Conference (Christy)

Status:

Central Coast LRMP meeting with industry scheduled for 20th October at the BCYCM. Rolf and I expect reps from most of the active companies. We want to know what they consider to be important in each of the designated planning areas and what wording they want to see in the final document.

Dani Alldrick has resolved most of the "boundary fault" issues between Central Coast and Cariboo. This will improve the credibility and appearance of Mapguide. Ward will implement the changes when he can.

Exploration Review and Victoria presentation figures, graphs and slides well on the way. Pamela's arrival has speeded up the process considerably.

Southwestern Region Exploration Review and Victoria presentation figures and slides less advanced.

GSB Poster Displays still to come.

Operational Issues:

Absences the next week or two are going to leave the office understaffed.

Note: Jo Sheared is tied up with the Industrial Minerals Conference next week, so isn't available to show us around Slesse. I suggest we wait until after the Victoria meeting.

Note: Nucanolan Resources is currently drilling at Lara. Greg Carriere has suggested that I join him for a visit on 3rd November. I will put in a request form today.

Note: Boliden-Westmin has had another good hit in the Marshall zone at Myra Falls (not releasing assays though!). The company will spend around \$4.2 million this year!

Subject: Southwest Region Update - October 16, 1998

ISSUES:

- Hall and Ludwig met with about 100 residents and civic officials in Mission to discuss concerns arising from a recent amendment to Allard Contractors' Keystone gravel pit permit. The Branch has committed to follow up on issues of noise, hours of work, sedimentation of streams and air particulates.
- LARA MONTEITH BAY Permits for mineral exploration work on the Lara Property (Chemainus) and Easy 3 Property (Monteith Bay) were unreasonably delayed due to MOF failure to recognize Schedule H of the Notice of Work as an application for cutting authority. This points to the need for further education of MOF district officials regarding the MX Code.
- Other inefficiencies of the review process under the MX Code have been identified by regional staff, such as the need for permitting of minor slashing on overgrown trails, the lengthy MOF process of tenure statusing that makes the legislated timelines difficult to achieve, and processing of draft MOF approvals prior to issuance of final documents. HQ may want to consider an MX Code progress review to initiate de-bugging of the process.

→ I agree! (TGS)

FYI:

- VIMDRC meeting is scheduled for October 20th in Nanaimo to review Boliden-Westmin Myra Falls seismic upgrading project and long-term tailings storage strategies.
- Hall meeting with MOF and MELP reps in Squamish October 21 to attempt resolution of road access issues through Britannia mine property.

ADMIN:

- Penny Jansen has accepted the position of Office Assistant, replacing Trudy Burroughs who retires at the end of November. Penny has a long history of government service at BC Ferries and the Liquor Distribution Branch, and is presently working at Energy and Mines in Victoria.
- The Nanaimo Mineral Planning Geologist position has been confirmed as an LSO3 classification by PSERC; the position should be posted on November 6th.

Robert, thanks very much for the brief report. Given that my First Draft of the "1998 Review" is going 'out' tomorrow, do you suggest adding LARA to the PROVINCIAL highlight map and text under "advanced" projects - now, or wait 'till last few holes are completed, if then? Tom.

* [I had a good visit with Jim Richards yesterday. Nucanolan has drilled 7 holes for aggregate 1007 metres so far. They have money for another 1000 metres and plan to start up again on Monday with two more holes west of Silver Creek. It will be a few days before they move east of the Creek. They are drilling the Coronation Extension zone east of the Portal and have had one very significant intercept so far (4.5 metres of good looking stringer ore containing sphalerite and chalcopyrite along with the usual pyrite). No announcement of grade yet but Jim says it does contain gold.

Nucanolan's program is based on ideas put forward by Rick Walker and Giles Peatfield in 1994. They feel that the Coronation zone is overturned and chopped up by numerous n/s oriented transcurrent faults that move the zone northward as you track it back towards Mount Sicker. There is deep overburden and little outcrop to go by and Jim feels that Minnova may not have made sufficient allowance for the faulting in placing their holes. Many may have gone over the top of the zone. The company hopes to locate the zone east of Silver Creek (which is probably one of these faults). If it does, that will be a significant advance. All in all, there is still a lot to play for.

Site. 620 - 475 Howe St.
Van. BC V6C 2B3

Meeting in MDO - Mon Jan 15/07
10:30 - 11:00
[TGS + BN + SR]
- SR had been in Mines Br. office
in Victoria - last Friday
(no contact/info apparently made)
- SR didn't have any info/knowledge
of database systems
- BN showed SA database systems
- SR req. copies of Laramide
Ann. Rpts from TGS' file
- later (TGS)

Tel.
604-682-1929
Fax
604-

- **Beau Pre Exploration Sooke Area Valentine Mountain Au Quartz Vein Project Update:** Notice of Work application received for 2, 300m. deep diamond drill holes to test depth potential of two known targets on the project (MINFILE 092B 108).
- **Inspiration Mining Port Renfrew Area Jasper Cu-Zn-Ag-Au VMS Project Update:** Field visit planned on October 9 at commencement of surface geochemical program with vendor/consultant Arne Birkeland, plus Nick Massey and Tom Schroeter of the G.S.B., to this VMS project (MINFILE 092C 080, -081).

Government/Ministry Activity:

- **Eastfield Minerals Bella Coola Area Thunderbird Cu-Zn-Ag-Au VMS Project Update:** Analytical results received from August site visit with Larry Diakow and Tom Schroeter to Nifty (MINFILE 093D 006) showing on Thunderbird Project, and issued to Eastfield and copied to Larry Diakow of the G.S.B.; highlights of results in 3 samples analyzed of 6 collected include 2.25% Pb, >10% Zn, >100 g/t Ag and anomalous Mo, Cu, Mn, Cd and Hg; established contact with Glen Garratt of Eastfield.
- **Laramide Resources Lake Cowichan Area Lara Cu-Zn-Ag-Au VMS Project Update:** Analytical results received from September site visit with Greg Carriere to Lara (MINFILE 092B 129) prospect, with results issued to Laramide; spectacular results on 2 samples of 3 taken include up to 2.9%Cu, 2.6%Pb, >10%Zn, >100g/t Ag, 7.5g/t Au and anomalous As, Cd, Sb, Hg, Te, Ga; no acknowledgement yet received from Laramide; most of the claims comprising the Lara property will expire in January, 2002.
- **2001 Regional Geologists Meeting and Field Trip to Harrison Lake PGE Area - October 16-18:** Field trip and meeting canceled as a cost saving measure by the Mines Branch; participants notified; suggest conference call October 16? alternate?
- **Geological Survey Branch 2001 Activity Review in Victoria - October 12:** Attendance planned to this annual activity review.
