NEVILLE CROSBY INDUSTRIES

8862295 PAKK

(1) PAKK

Mon. Sept. 25/00
Sunny +18°

- with Paul Wilton
- Peter Klewchuck

Highwood / Dynacon "High Ur, MWT"

Hellroaring Ck. Stock ~ 1370 Ma Pc

Brush Wellman Co - Utah - 40 beryl open pit

Richfield. Res.

~ 1/2 MT @ .12% BeO

B-W 1.25% beryl 529 ppm

- "washed" area

- Rubidium, beryllium, cesium [max. beryl = 4% Be]

- Rubidium in perthite (microcrystalline beryl in albite)

Photo perthite — albite streaks

Photo - Look S towards Jack Ck. (up Hellroaring Ck.

- walk (steep) down slope to look at steps of individual (isolated) beryl xtls (white + ± green/yellow) in perthite (down to top of logging cut)

68 holes (680 m) in 17 lines up/down ridge spine

PAKK

Mon, Sept. 20/99

- Chapleau, Resi; with Paul Wilton
Sunny +25°C

Dave Pighin - Super Group Holdings
very helpful prospector - Craig Keegan (ex-Lornex) Peter Klewchuck

CRUZ - Chapleau - to start
2 ddh

(2)

CAR - ~6000 ft total; drilling on 4th hole → to 608m
- disappointing results on 4th
Pit - North
Pit - South
(200')

Airborne target - Pakk (lower Jack)

PAKK - 2nd area of drilling - sedex
Sinclair - showing 600m
Lower Jack - high Pb-Zn-As (>300 ppm) soil geochem
Upper Jack - fan ddh → 1st priority
- fan rm. E-W (~500m X 30m + disseminated + native Cu
(just east of Mount Evans)
+ qtz, actinolite, albite

- ex-Minnova's HORN prop. (adj. east on Pakk)
now part of Pakk prop.

- stratigraphic data + geochem (Pb, Zn, As)
- numerous 'vents' (+ fragmentals)
