REA GOLD - Discovery Zone

- Doug Blanchflower

→ soil geochem (hematite soils) find! (+ prospecting - M Hilton)

- good Au-Ag soil geochem. Also As + Zn

1983
L97 (new)
RG8 Lens, L100 Lens + L98 (new)

> 1000ppb → av. 3 to 6% in 'ore' zones

- Good VLF-EM conductors (Max-Min; Dighem)

→ drill upwards from argill. into m.s.

- Adit driven in mafic volcs. (ie. below chert 'horizon' + ore) (better ground conditions) i.e. rk. quality problems.

- plan to raise up + drill.

- new fault = new m.s. lens (7.5m thick)

1.85m - also 'new' - much less As content

- need to screen + shot cret entire tunnel? - incl. graphitic argill.

- plunges to SE.

Metallurgy - Giant Bay
Au - 94-95%

- also increase in reserves
