September 22-26, 1988

ITINERARY: The three deposits to be visited are Cinola (City Resources), Silbak-Premier (Westmin Resources), and Equity Silver mine. Equity Silver is the largest silver producer in the Province; Cinola and Premier are new mines in the preproduction stage. The deposits are volcanic-related, bulk-mineable precious metal deposits. Cinola is a Tertiary hot spring-type epithermal Au deposit; Silbak-Premier is a Jurassic, somewhat deeper-level, epithermal stockwork-type Au-Ag deposit; and Equity Silver is a Ag-Au-Cu-Sb-As deposit transitional between a porphyry copper and epithermal setting.

The tour will provide spectacular coast and mountain scenery in the Queen Charlotte Islands and mainland British Columbia. Technical presentations will include overview lectures, on-site briefings by mine and exploration staff, an underground visit at Cinola, and tours of surface workings at Silbak-Premier and Equity Silver.
