MITCHELL BAY

Fri July 6/01

(SHIKO) (Redgold)

Sunny +20°C

- with Bob Lane + Rudi Durfold (PAA)

- Imperial Metals optioned + drilled
in 1996.

MI-934058

Photo - Look N over trench on
Red gold zone (Quersel lk. in bkgd.)

- 'prophylic' alt'n - epidote, chlorite
in 'syenite' - cpy + mal + tenorite
+ calcite

- Rudi following up
on PGE potential in alkalic rx.

- 'clotty' (epidote) green 'texture'
(replacement?) in siliceous pink matrix

QUARRY → pink syenite^(undersaturated) with
ab. magnetite + minor cpy + mal.

- rare mafic 'clots' (xenoliths) - up to 4" long

- drilled in 1996 (2 dth), plus channel saw ^{sampled.}

- rare xenolith (> 6") of more mafic
(dioritic) rk. with ab. (> 1% Cu) dissemin^{is added as}
[probably best 'host' for copper] a 'sponge'

'Fresh' stone used for facing of Jack Davis
