Ministry of Energy, Mines & Petroleum Resources

Attention: Allan Ludwig
District Manager

Dear Allan:

Re: File 14675-30/Valentine Mountain Program Permit MX8-21

As per my telephone call to your office December 6, 1995, I am confirming that the bulk sampling/diamond drilling project was not completed during 1995 as financing was not completed.

In fact, 20 tons plus of ore was mined from the "C" Trench and is stored on-site for processing when a small portable mill is bought.

All tailings from LAB/Scale testing is contained in a small lined pond for further gridding. (Mr. Lockhardt and Mr. Morrisson viewed the site for the Ministry on May 3, 1995.)

Enclosed are some assays from our 1995 work and a graph of the test blocks processed off site in previous years.

Please renew our Permit for 1996 season as it is expected that a 20 ton portable ~~XXXXX~~ ^{mill}
WILL BE PURCHASED IN THE NEAR FUTURE
